

signagelive® all-in-one 32"

Remote Media are digital signage pioneers, the signagelive® all-in-one combines the latest high definition LCD screen technology and an embedded player to create an all-in-one solution capable of remote updates via signagelive® over any Internet connection.

By combining software, hardware and LCD screen into a single device, the signagelive® all-in-one offers unrivalled digital image quality and ease of installation with no need to find a home for a separate screen and PC. Just install using a standard VESA 200 bracket, plug in a network cable and turn on the power for a unique all-in-one digital signage solution.

Available in 32" portrait or landscape operation, the signagelive® all-in-one is ready for connection to the web-based signagelive® digital signage platform straight from the box, the signagelive® all-in-one is the product of choice for your digital signage applications.

Finished in black, with the option for a front bezel or with brackets for custom mounting into an enclosure.
